

THE CONFIDENCE TO RETURN TO SAFE WORK ENVIRONMENTS

NUMBER 1 IN HEALTHCARE, NATIONWIDE

As the government lifts restrictions on the lockdown, many Namibians will be returning to their official places of work. However, with COVID-19 still rampant it is essential that employers take preventative measures and pay vigilant attention to hygiene and sanitation.

To maintain productivity, employees need to feel safe and confident that every measure is taken to clean and sanitise the workspace. Employees should wash their hands regularly and use hand sanitiser after contact with office apparatus. All surfaces should be sanitised and procedures should be put in place to deep-clean floors and work spaces.

WCCS has extensive experience in healthcare environments, where meticulous deep cleaning, sanitation and high-service standards are crucial. This, along with our considerable expertise in crisis management, puts us in the unique position of being able to roll out rapid, COVID-19 specific solutions.

ELECTROSTATIC DISINFECTION

Our specialised electrostatic disinfection and cleaning solution use technology to deep clean and disinfect every millimetre of surface and hard-to-reach space. An electrostatic sprayer is used in conjunction with a broad spectrum virucidal, bactericidal and fungicidal disinfectant. As the solution leaves the sprayer it is electrically charged, ensuring better adherence to all sides of surfaces and a more even distribution, resulting in better disinfection.

WHAT WE OFFER

We offer maintenance cleaning services for **offices, schools, nursing homes, hotels, industrial premises, mining operations, government buildings, hotels, shopping centres and hospitals**, as well as once-off and periodic services that include pre-occupation cleans, highpressure cleaning, exterior building cleaning, preparation and restoration of floor surfaces and deep cleaning of ablutions for offices and factories.

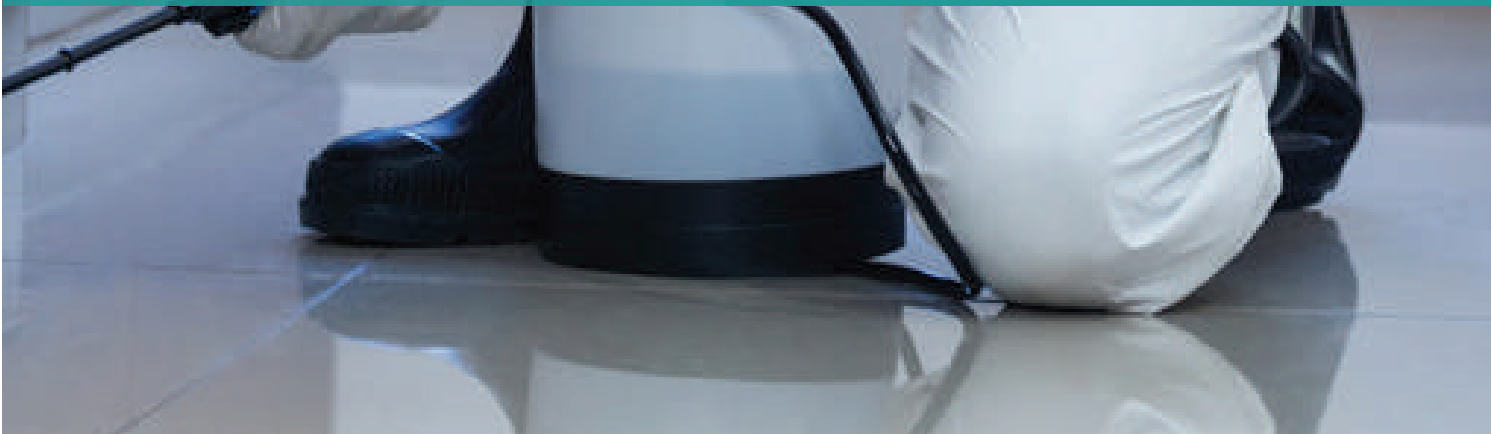

Approved, certified and environmentally friendly chemicals that contains antimicrobial agents.

HOSPITAL-LEVEL CLEANING FOR EVERY ENVIRONMENT

With our roots in the healthcare sector, WCCS is equipped to offer tailored services to help your organisation reduce the risks of spreading COVID-19, in line with recommendations from the National Institute of Communicable Diseases.

We offer full-service hygiene support for your staff and can deploy specialised COVID-19 teams to clean and disinfect buildings (pre- and during occupation).

COVID-19 SPECIALISED CLEANING AND DISINFECTION

Knowing that a person has contracted the COVID-19 virus can be stressful and raises the question of where the contact took place. Employers need to act swiftly so as not to raise alarm. WCCS Specialised Services has the knowledge and experience to deal with stressful situations. Our teams are trained to systematically clean and disinfect the facility to ensure all surfaces and critical touchpoints are sanitised and treated with the correct chemicals and methodologies.

- Rapid and effective response to ensure employee's safety and morale.
- Workspace can be re-occupied in a short timeframe.

DEEP CLEANING

Mechanical surface cleaning has been proven to substantially reduce bacterial colonies. Regular deep cleaning and sanitisation provides employees with peace of mind that their work environment is safe.

- Cost effective and efficient
- Certified and approved chemicals
- Touch-point sanitation reduces the risk of transmission
- Professionally trained staff
- Training in infection control practices, including PPE usage and other personal preventative measures

SPECIALISED PEST CONTROL

Buildings such as offices, schools and production facilities often provide the ideal living conditions for pests. When these buildings are unused for extended periods, nuisance pests such as vermin and cockroaches can quickly infest the space. Upon reopening, it is necessary to eliminate these pests to ensure a safe and hygienic environment. WCCS pest control operators all work with registered PCOs.

- Environmentally friendly eradication and removal of rats and mice
- Cleaning and disinfection after rat and mouse activity (droppings, carcasses and nests)
- Elimination of cockroaches, silverfish, flies, mosquitos and other crawling and flying insects
- Spraying
- Baiting and trapping
- Disinfection of high-risk pest harbourages, such as refuse areas, drains and grease traps
- Fogging to control flying and crawling pests

HYGIENE SOLUTIONS

WCCS are seasoned professionals when it comes to delivering immediate, cost-effective solutions for a germ-free environment. We eliminate sanitation and health threats through high-level hygiene solutions from washroom fixtures and equipment to the chemicals and processes necessary to keep workspaces clean, healthy and productive.

- Eco-friendly hand sanitisers
- Advanced hand-sanitation dispensers
- No-touch hand drying solutions
- Washroom sanitation and dispensing solutions
- Odour control solutions
- Pest control solutions
- Biomedical waste management

ULV COLD FOGGER

Tank Capacity	4 Liters (1 Gallon)
Power	220V / 110V
Motor	1170W
Flow Rate	60 LPH (GPH)
Droplet Size	5 - 50 microns
Net Weight	3.7 kg (8.2 lb)
Dimensions (cm)	52 x 30 x 16
Dimensions (inch)	20.5 x 11.8 x 6.3

The compact C100+ cold fogger is one of the most powerful and durable ULV machines in the market today. Equipped with our exclusive 1170 watt motor, this fogger can produce a powerful flow rate of 60 LPH (16 GPH) and can easily cover an area of 100m² in less than a minute. With an adjustable droplet size between 5050 microns, this fogger can quickly apply disinfectants, biocides or insecticides to eradicate vectors, carriers and pests.

DIVOSAN SUREDIS CONCENTRATED DETERGENT DISINFECTANT

DESCRIPTION

Divosan Suredis is a high-performance, terminal disinfectant suitable for open plant cleaning applications throughout the food, beverage and dairy industries. The ingredients used in Divosan Suredis are carefully selected for reduced environmental impact.

APPLICATIONS (Usage Areas)

Divosan Suredis is ideal for use in food processing factories, restaurants, kitchens, food handling areas etc. Safe for use on all food contact surfaces, tables, conveyor belts etc.

BENEFITS

- Highly effective terminal disinfectant for food industry use
- Reduced environmental impact especially for treatment of waste-water
- Non-corrosive
- Non-tainting, use on food contact surfaces
- Effective in soft or hard water.

FOGGING PRICING STRUCTURE

Surface area	m ²	Each
1200 and above	N\$1.00	
Less than 1200	N\$1200.00	Setup fee
Mining Trucks		N\$40.00
Earth Moving Equipment		N\$45.00
LDV Double Cab		N\$22.00
LDV Single Cab		N\$20.00
Sedans		N\$30.00
16 Seater Buses		N\$35.00
50 Seater Buses		N\$55.00
50+ Seater Buses		N\$65.00
Petro Generator		N\$200 per hour
